Imagine the Uncommon

That's what I wish to see in this development.

A place for people to feed the geese or wildlife that's common to our area.

A pond with a water feature in the middle

A recycled plastics walking trail highlighted with art displays

Wifi

A kids play area with chalkboards, musical instruments and activities that are educational

A dinosaur not a real one of course

A recording studio booth. Bring your own device

An area for the seniors to lunch in

A veranda to sit and eat

A bridge to connect the areas

A big mirrored orb to take pictures and display our growth

Music piped in

An artists easle

A petting zoo

A train made of wood half scaled and a

track for children
